EXHIBIT 99.E

RECENT DEVELOPMENTS

The information contained in this section supplements the information about the Republic corresponding to the headings below that is contained in Exhibit 99.D to the Republic's annual report on Form 18-K for the fiscal year ended December 31, 2020. To the extent the information in this section differs from the information contained in that annual report, you should rely on the information in this section. Capitalized terms not defined in this section have the meanings ascribed to them in the annual report.

REPUBLIC OF INDONESIA

Recent Developments

Recent Public Health Developments

The Covid-19 outbreak continues in Indonesia. Daily cases of Covid-19 in Indonesia experienced an increase from mid-May 2021 to late July 2021, primarily due to the Delta variant, and decreased gradually from July to December 2021. In December 2021, Indonesia recorded its first Omicron variant case and since then, the daily cases of Covid-19 in Indonesia, including Omicron variant cases, experienced an increase. As of February 26, 2022, the country had recorded approximately 5.5 million cases of Covid-19 since the start of the pandemic, of which over 147,000 were fatal.

The Government continues to vaccinate the population, and as of February 26, 2022, approximately 143.7 million persons were fully vaccinated and approximately 190.6 million persons had received a single dose of a vaccine. Since December 14, 2021, the Government began to vaccinate children from the ages 6 - 11 years old. In addition, on January 12, 2022, the Government started a booster vaccine program to citizens above 18 years old who had been fully vaccinated more than six months.

Selected Key Economic Indicators

The following table sets forth certain of the Republic's principal economic indicators as of and for the specified dates and periods.

			Year Ended I	December 31,		
	2016L	2017L	2018L	2019L	2020P	2021P
National account and prices:						
Real GDP growth (period-on-period)	5.0%	5.1%	5.2%	5.0%	(2.1)%	5.0%
Per capita GDP (in millions of Rupiah)	48.0	51.9	56.0	59.1	56.9	62.2
Per capita GDP (in U.S. dollars)(1)	3,604	3,877	3,927	4,175	3,912	4,350
Average exchange rate (Rupiah per U.S. dollar)(2)	13,305	13,385	14,246	14,139	14,525	14,296
Inflation rate ((year-on-year) change in CPI)	3.0%	3.6%	3.1%	2.7%	1.7%	1.9%
External sector:						
Current account (% of GDP)(3)	(1.8)%	(1.6)%	(2.9)%	(2.7)%	(0.4)%	0.2%
Fiscal account:						
Budget deficit (% of GDP)	(2.5)%	(2.5)%	(1.8)%	(2.2)%	(6.1)%	(4.7)%
External debt of the central Government (in trillions of Rupiah)	1,496.3	1,648.2	1,857.4	1,815.1	2,041.0	2,075.2
Debt service ratio (% of Government revenue)	32.5%	34.0%	39.1%	42.8%	45.4%	42.2%

Economy and Gross Domestic Product

Principal Sectors of the Economy

Indonesia's principal economic sectors are the manufacturing industry (including coal, oil and gas); agriculture, forestry and fishery; wholesale and retail trade, repair of motor vehicles and motorcycles; construction; and mining and quarrying.

The following tables show the composition of Indonesia's GDP by sector at current prices and constant prices, respectively, for the periods indicated.

Manufacturing Industry

In 2021, Indonesia's manufacturing industry grew by 3.4% compared to the 2.9% contraction in 2020. Non-coal, oil and gas manufacturing industries grew by 3.7%, mainly driven by growth in the transportation equipment industry, basic metal industry, and machinery and equipment industry subsector, which grew by 17.8%, 11.5% and 11.4% respectively.

P Preliminary.

^{*} Includes the Procurement of Electricity and Gas; Procurement of Water, Management of Trash, Waste and Recycle; Accommodation and Food Beverages Supply; Real Estate; Corporate Services; Health Service and Social Activity; and Other Services sectors.

REPUBLIC OF INDONESI	Donnelley Financial	VDI-W10-DPF-365 RHK madai0dc	07-Feb-2022 12:30 EST	238149 EX99_E 5	8*
FORM 18-K/A	None	SNG		HTM PMT	1C

Page 1 of 1

Wholesale and retail trade; repair of motor vehicles and motorcycles

In 2021, the wholesale and retail trade, repair of motor vehicles and motorcycles sector increased by 4.7% compared to the 3.8% decline in 2020. This was driven by the trade of cars, motorbikes and the repair subsector, which grew by 12.1%, as a result of the implementation of sales tax incentives on luxurious goods which drives an increase in the number of car sales.

Agriculture, forestry and fishery

In 2021, the agriculture, forestry and fishery sector grew by 1.8%, the same as in the previous year. This growth was mainly driven by the fishery subsector which grew by 5.5% due to an increased production of captured fish and seaweed cultivation. The agriculture, livestock, hunting, & agriculture services subsector grew by 1.1% as compared to 2020.

Mining and Quarrying

In 2021, the mining and quarrying sector grew by 4.0% compared to a contraction of 2.0% the previous year. This was mainly driven by the metal ore mining subsector, which grew by 22.8% due to increase in copper and gold production. The oil, gas and geothermal mining subsector contracted by 4.4% due to a decrease in the amount of oil production.

Oil and Natural Gas

The following table sets forth the average price of Indonesian crude oil, measured by the ICP, for the periods indicated.

	December	
	2020P 2	2021P
	(in U.S. doll	lars
	per barrel)	
ICP(1)	40.4	73.4

Sources: Directorate General of Oil and Gas, Ministry of Energy and Mineral Resources

- P Preliminary.
- (1) ICP is calculated as the sum of the Dated Brent and Alpha prices. Dated Brent is calculated based on the publication average of the current month, while Alpha is calculated based on publication average within the current month or the publication average within the current month and the previous month, taking into account the quality of crude oil, development of international crude oil prices, and/or national energy resilience.

Construction

In 2021, the construction sector grew by 2.8% compared to 3.3% contraction in 2020. This is in line with the increase in infrastructure activities and the increase in imports of raw materials for construction activities.

Transportation and Warehousing

In 2021, the transportation and warehousing sector grew by 3.2% compared to 15.1% decline in 2020. This was partly due to increased mobility in public transportation and recreational areas.

Information and Communication

In 2021, the information and communication sector grew by 6.8% compared to 10.6% in 2020. The slower growth was partly due to decline in the information industry, which includes the printing and paper goods industry.

(1) Annual percentage year-on-year.

(2) From January 2020, BPS calculated CPI based on a consumption pattern obtained from a cost of living survey conducted in 2018 in 90 cities in Indonesia. Prior to January 2020, CPI was based on a consumption pattern obtained from a cost of living survey conducted in 2012 in 82 provincial capital cities in Indonesia. The categories of commodities measured under the cost of living survey changed between the 2012 and the 2018 surveys. Accordingly, inflation by commodity for 2020 and 2021 may not be directly comparable to prior periods.

As of December 2021, annual inflation was 1.9%, which was slightly higher than the 1.8% annual inflation in November 2021. This was primarily due to increases in the prices for: food, drinks and tobacco; food and

⁽¹⁾ Calculated on the basis of 2018 CPI = 100 for 2020 and 2021. From January 2020, BPS calculated CPI based on a consumption pattern obtained from a cost of living survey conducted in 2018 in 90 cities in Indonesia.

- (1) Working age population refers to all persons in Indonesia 15 years old or older and includes certain non-workforce categories such as students and home makers.
- (2) The Government defines unemployment to include all persons 15 years old and older without work who (i) are looking for work, (ii) have established a new business, (iii) are not looking for work because they do not expect to find work, and (iv) have made arrangements to start work on a date subsequent to the unemployment measurement date.

Income Distribution

As of September 2021, Indonesia had a Gini Index of 0.381. The Gini Index is a measure of income distribution that ranges between 0.0 and 1.0, with higher numbers indicating greater inequality. In practice, the lowest value does not go below 0.2 and the highest value may reach 0.6.

The percentage of people living below the poverty line in Indonesia has exhibited a decreasing trend since the Asian financial crisis in 1998. BPS measures poverty using a basic needs approach and defines poverty as an economic inability to fulfill food and non-food basic needs, measured by consumption and expenditure. Based on this methodology, approximately 49.5 million people, or 24.2% of the population, were living below the poverty line in 1998, and this decreased to approximately 26.5 million, or 9.7% of the population, as of September 2021.

Regional Growth

As the island with the highest population density, high consumption and an industrial base, Java has historically been the main contributor to Indonesia's economic growth. Based on preliminary data for the year ended December 31, 2021, Java contributed 57.9% of the country's GDP, Sumatera contributed 21.7%, Kalimantan contributed 8.3%, Sulawesi contributed 6.9%, Bali and Nusa Tenggara contributed 2.8%, and Maluku and Papua contributed 2.5%.

- P Preliminary.
- (1) Includes privatization and banking restructuring.
- (2) Presents foreign direct investment in accordance with the directional principle prescribed by BPM5.

The net foreign direct investment increased by U.S.\$1.9 billion to U.S.\$15.8 billion in the first nine months of 2021, compared to U.S.\$14.0 billion in the same period last year, primarily in the form of equity capital in line with the promising national economic outlook. The other sectors (including service and properties) and manufacturing sectors were the main contributors to net foreign direct investment inflows in the first nine months of 2021. Based on country of origin, investors from Asian emerging markets (including China) were the main contributors to foreign direct investment inflows, followed by ASEAN countries.

Foreign Portfolio Investment

The following table sets out the amounts of foreign portfolio investments in Indonesia by non-residents.

Page 1 of 1

In the first nine months of 2021, foreign capital inflows in the form of portfolio investments recorded an increase to U.S.\$11.4 billion, from U.S.\$2.0 billion in the same period of last year. The higher surplus during the first nine months of 2021 was primarily attributable to the issuance of global bonds and increasing foreign capital inflows in the stock market.

Other Foreign Investment

The following table sets out the amounts of other investments (other than portfolio or foreign direct investments) in Indonesia by non-residents, mainly consisting of loans received and paid.

Other Foreign Investments

	Year Ended December 31,	Nine Mont Septeml	
	2020P	2020P	2021P
	(in mill	ions of U.S. dollar	·s)

Other (net)(1)	975	(288)	7,947
Total other investments	2,417	2,761	1,380

Source: Bank Indonesia

In the first nine months of 2021, other foreign investments recorded a surplus of U.S.\$1.4 billion, lower than surplus of U.S.\$2.8 billion in the same period of 2020. The lower surplus primarily stemmed from lower disbursements of government and corporate sector loans, coupled with higher repayment of corporate sector loans.

P Preliminary.

⁽¹⁾ Consists of loans of public sector and trade credit, currency and deposits, and other liabilities of private sector and public sector.

Foreign Trade and Balance of Payments

Exports and Imports

Exports and Imports

	Year Ended December 31,	Nine Montl Septemb	er 30,
	2020P	2020P	2021P
	(in mi	llions of U.S. dollar	s)
Exports:			
Oil and gas exports (f.o.b.)	8,480	6,069	9,625
Non-oil and gas exports (f.o.b.)	154,879	111,099	155,810
Total exports (f.o.b.)	163,359	117,168	165,435
Total imports (c.i.f.)	(142,147)	(104,022)	(141,373)
Balance of trade	21,213	13,147	24,062

Source: Bank Indonesia P Preliminary.

In the first nine months of 2021, Indonesia recorded a trade surplus of U.S.\$24.1 billion, which increased from the U.S.\$13.1 billion surplus in the same period of 2020. The higher trade surplus was caused by a 41.2% year-on-year increase in exports, which was higher than the 35.9% year-on-year increase in imports. The improvement of export performance was due to stronger demand from main trading partner countries, coupled with higher international commodity prices. Consistent with stronger exports, imports also experienced an uptick compared to the same period last year as the domestic economy continues to recover.

Export-Import Data from the Central Statistics Agency

In addition to the exports and imports related data published by Bank Indonesia, the Central Statistics Agency or BPS also publishes data relating to imports and exports compiled based on the International Merchandise Trade Statistics Manual issued by the United Nations. Due to the different methods and timing of compiling export-import statistics, the export-import data published by BPS is different to the export-import data published by Bank Indonesia.

The tables below show Indonesia's exports and imports for the periods indicated as published by the BPS.

	December 31,	
	2020R	2021P
	(in millions of	U.S. dollars)
Exports:		
Non-oil and gas exports	154,940.7	219,265.2

P Preliminary.

Bank Indonesia uses (+) and (-) signs in its published data to follow BPM5 whereby (+) means inflow and (-) means outflow. In financial account, (+) denotes increase in liabilities or decrease in assets, while (-) represents increase in assets or decrease in liabilities. The table above has been adjusted to align with the formatting hereof.

REPUBLIC OF INDONESI Donnelley Financial FWPRHK-PFRN15 RHK pf_rend 07-Feb-2022 12:43 EST 238149 EX99_E 24 6*

age 1 of 1

- (2) The calculation of export and import figures included in the balance of payments data compiled by Bank Indonesia differs in coverage and timing from the data on export/import trade compiled by BPS.
- (3) Presents the position of reserve assets at the end of period. A surplus/deficit in the overall balance of payments during a reporting period will increase/decrease the outstanding amount of reserve assets at the end of that period.

After recording a U.S.\$5.3 billion deficit in the first nine months of 2020, the current account recorded a U.S.\$1.4 billion surplus in the first nine months of 2021. Better performance of current account was primarily supported by a goods trade surplus due to stronger exports in line with the increasing demand of Indonesia's main trading partners and rising global commodities prices, amidst increment of imports as the domestic economy continues to recover. On the other hand, the services trade balance deficit increased, mainly due to freight services payments as goods imports increased as well as slumped travel services as travel restrictions continued. The primary income deficit also widened due to increased yield payments in line with corporate performance improvement.

The capital and financial account recorded a U.S.\$13.4 billion surplus in the first nine months of 2021 on the back of direct investment and portfolio investment surpluses in line with positive investor perceptions of domestic economic outlook amidst ongoing global financial market uncertainty. Nonetheless, the surplus increased from a U.S.\$8.9 billion in the same period last year, primarily stemmed from the increasing surplus of direct investment and portfolio investment.

Indonesia's overall balance of payments in the first nine months of 2021 recorded a surplus of U.S.\$14.3 billion, accompanied by official reserve assets of U.S.\$146.9 billion as of September 30, 2021, an increase from U.S.\$135.9 billion as of December 31, 2020.

Financial System

The Banking System

As of October 31, 2021, total banking assets were Rp10,003.9 trillion, consisting of commercial bank assets of Rp9,824.5 trillion and rural bank assets (including assets of sharia rural banks) of Rp179.4 trillion.

Islamic Financial System

As of October 31, 2021, of the 89 underwriters licensed by OJK, only 26 were involved in issuances of Sukuk, and only 61 of the 98 investment managers (including one sharia investment manager fully managing Sharia funds) were licensed by OJK.

As of October 31, 2021, assets of Sharia banks were Rp439.4 trillion, or 4.4% of Indonesia's total banking assets.

Capital Markets and Capital Markets Regulation

The following table sets forth key indicators regarding the IDX and any securities traded on the IDX as of and for the year ended December 31, 2021.

Indonesian Stock Exchange

	<u>IDX</u>
Market capitalization (in trillions of Rupiah)	8,255.6
Listed shares (in billions of shares)	7,227.3
Average daily transaction value (in billions of Rupiah)(1)	13,372.2
Average daily transaction volume (in millions of shares)(1)	20,633.4

Source: IDX

The IDX, a self-regulatory body, has two indices based on Sharia stock, the Jakarta Islamic Index ("JII"), and the Indonesia Sharia Stock Index ("ISSI").

The JII is a stock market index established on the Indonesian Stock Exchange. The JII was launched in 2000 and consists of the 30 largest Sharia-compliant listings by market capitalization and average liquidity in the regular market. As of December 31, 2021, the market capitalization of the JII was Rp2,015.2 trillion.

The IDX launched the Indonesia Sharia Stock Index, or ISSI on May 12, 2011. The ISSI is comprised of 495 Sharia stocks which are listed on the IDX as of December 31, 2021. As of December 31, 2021, the market capitalization of the ISSI was Rp3,983.7 trillion.

Monetary Policy

Bank Indonesia has maintained a pro-growth policy stance, directing the full panoply of monetary, macroprudential and payment system policy mix instruments towards supporting the national economic recovery in close coordination with the Government. In the monetary sector, an historically low policy rate has been maintained along with rupiah exchange rate stability and liquidity injections through quantitative easing. The low policy rate will be maintained until there are indications of rising inflation. Since 2020, Bank Indonesia has lowered the BI7DRR policy rate six times to 3.50%, the lowest in history. The rupiah exchange rate stabilization policy was implemented using triple intervention in the spot market, Domestic Non-Deliverable Forwards ("DNDF"), and the purchase of Government securities in the secondary market, amid persistent global financial market uncertainty. Likewise, Bank Indonesia continued to inject liquidity via quantitative easing to strengthen the banks' ability to extend credit/financing to the corporate sector.

⁽¹⁾ For the year ended December 31, 2021.

REPUBLIC OF INDONESI Donnelley Financial SG5214AM101255 RHK fooed0sg 11-Feb-2022 04:41 EST 238149 EX99_E 29 9*
FORM 18-K/A None SNG HTM PMT 1C

age 1 of 1

In September to December 2021, Bank Indonesia maintained the BI repo rate at 3.50% and maintained the deposit facility rate at 2.75% and lending facility rate at 4.25%. The decision is consistent with the need to maintain exchange rate and financial system stability amid projected low inflation and efforts to revive economic growth. Liquidity conditions also remain very loose in line with Bank Indonesia's accommodative monetary policy stance and the impact of synergy between Bank Indonesia and the Government to support the national economic recovery. Bank Indonesia has injected liquidity through quantitative easing (QE) to the banking industry totalling Rp141.19 trillion in 2021 (as of December 14, 2021). Bank Indonesia in 2021 has purchased government debt securities to fund the 2021 State Revenue and Expenditure Budget (APBN) totalling Rp201.32 trillion, comprising: (i) Rp143.32 trillion through primary auction in accordance with the Joint Decree (KB) issued by the Minister of Finance and Governor of Bank Indonesia on April 16, 2020 and subsequently extended on December 11, 2020 until December 31, 2021, and (ii) Rp58 trillion through private placement in November 2021 to fund the health and humanitarian budgets for Covid-19 pandemic handling in accordance with the Joint Decree (KB) issued by the Minister of Finance and Governor of Bank Indonesia on August 23, 2021.

Accommodative macroprudential policies continue to revive bank financing disbursed to the corporate sector in synergy with Financial System Stability Committee policy. This includes loosening the down payment requirements on automotive loans, Loan/Financing-to-Value (LTV/FTV) Ratio on Property Loans and(sharia) Macroprudential Intermediation Ratio (MIR), encouraging the banks to lower Prime Lending Rates, as well as other accommodative macroprudential policies. Bank Indonesia has also refined and modernized the MSME Credit Ratio policy into the Macroprudential Inclusive Financing Ratio (RPIM - Rasio Pembiayaan Inklusif Makroprudensial).

Bank Indonesia continues to accelerate payment system digitalization for integration of the national digital economy and finance, including expansion of Quick Response Code Indonesian Standard (QRIS) acceptance to 12 million merchants by the end of 2021, including cross-border QRIS, implementation of the National Open API Payment Standard (SNAP), as well as electronification of social aid program (bansos) disbursements, transportation modes, and government financial operations. Various agendas in the Indonesia Payment System Blueprint (BSPI - Blueprint Sistem Pembayaran Indonesia) 2025 have also been accelerated, including development of BI-FAST as a real-time retail payment system available 24/7, along with interlinkages between digital banking and FinTech, as well as payment system regulatory reform.

In addition to the three main policy initiatives above, Bank Indonesia also oriented all four supporting policies (MSMEs, Islamic Economy and Finance, Financial market deepening, and International policy) towards the national economic recovery. Close synergy with the Government, banks, and other institutions has been enhanced to develop MSMEs as well as the Islamic Economy and Finance as a new source of national economic growth in Indonesia. Financial market deepening has also accelerated, particularly the rupiah and foreign exchange money markets, to strengthen monetary policy transmission, support financial system stability, and finance development, including infrastructure. International policy has been directed towards not only strengthening Bank Indonesia's policy diplomacy, but also to support the Government in facilitating and promoting trade and investment in various countries.

In January and February 2022, Bank Indonesia maintained the BI 7-Day Reverse Repo Rate at 3.50%, and also maintained the Deposit Facility (DF) rates at 2.75% and Lending Facility (LF) rates at 4.25%. The decision is consistent with the need to maintain exchange rate stability, control inflation and stimulate economic growth amid a build-up of external pressure. Bank Indonesia will direct its policy mix in 2022 towards maintaining stability by supporting national economic recovery efforts. Monetary policy will focus on maintaining stability, while macroprudential policy, payment system policy, money market deepening as well as an inclusive and green economy and finance will be maintained to revive and support economic growth.

REPUBLIC OF INDONESI	Donnelley Financial	SG5214AM101255 RHK fooed0sg	11-Feb-2022 04:31 EST	238149 EX99_E 30 14*

age 1 of 1

Monetary policy in 2022 will focus on maintaining stability, while mitigating the global impact of policy normalization in advanced economies, the US Federal Reserve in particular.

- (1) Strengthening exchange rate policy to maintain rupiah stability in line with market mechanisms and economic fundamentals.
- (2) Normalizing liquidity policy, while safeguarding the banking industry's ability to extend financing to the corporate sector and purchase Government Securities to fund the State Revenue and Expenditure Budget (APBN), via the following adjustments to rupiah reserve requirements:
 - (a) Incrementally raising the rupiah reserve requirement for conventional commercial banks from the current average requirement of 3.0% and daily requirement of 0.5% as follows:
 - (i) From March 1, 2022, Bank Indonesia will raise the reserve requirement by 1.5% to 5.0%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% remuneration on the RR based on 4.0% of deposits.
 - (ii) From June 1, 2022, Bank Indonesia will raise the reserve requirement by 1.0% to 6.0%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% remuneration on the RR based on 5.0% of deposits.
 - (iii) From September 1, 2022, Bank Indonesia will raise the reserve requirement by 0.5% to 6.5%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% remuneration on the RR based on 5.5% of deposits.
 - (b) Incrementally raising the rupiah reserve requirements for banks and business units from the current average requirement of 3.0% and daily requirement of 0.5% as follows:
 - (i) From March 1, 2022, Bank Indonesia will raise the reserve requirement by 0.5% to 4.0%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% 'athaya on the RR based on 3.0% of deposits.
 - (ii) From June 1, 2022, Bank Indonesia will raise the reserve requirement by 0.5% to 4.5%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% 'athaya on the RR based on 3.5% of deposits.
 - (iii) From September 1, 2022, Bank Indonesia will raise the reserve requirement by 0.5% to 5.0%, calculated fully as an average. Banks fulfilling RR obligations will receive 1.5% 'athaya on the RR based on 4.0% of deposits.

- (1) Claims on the Government include net of the Government's deposits with the banking system.
- (2) Includes capital accounts, tradeable government bonds held by central bank and inter-system accounts.

As of December 31, 2020, broad money experienced faster growth on the back of narrow money and quasi-money. Totaling Rp6,905.9 trillion, broad money growth accelerated to 12.5% (year-on-year) compared to 6.5% (year-on-year) growth as of the end of the previous year. Narrow money growth increased to 14.9% (year-on-year) compared to 7.0% (year-on-year) as of the end of the previous year, in line with increases recorded in terms of currency outside banks, Rupiah demand deposits, as well as rupiah saving deposits that can be withdrawn at any time. Quasi-money growth increased to 10.0% (year-on-year), compared to the 5.8% (year-on-year) at the end of the previous year, due to increases in all components, namely time deposits, other saving deposits and foreign currency demand deposits.

As of December 31, 2021, broad money grew by 13.9% (year-on-year) compared to 12.5% (year-on-year) as of the same date in the previous year, resulting from faster growth in narrow money, despite slower growth of quasi money. Narrow money growth increased to 17.9% (year-on-year) as of December 31, 2021 compared to 14.9% (year-on-year) as of the same date in the previous year, due to faster growth in currency outside banks and rupiah saving deposits that can be withdrawn at any time. Quasi-money growth decreased to 9.3% (year-on-year) compared to 10% (year-on-year) at the same date in the previous year, due to slower growth in time deposits and other saving deposits.

- L LKPP (Financial Report of Central Government/Audited).
- B Budget.
- P Preliminary.
- (1) Primary balance represents revenues minus expenditures excluding interest expenditures.
- (2) In 2021, total financing of Rp868.6 trillion exceeded the 2021 deficit of Rp783.7 trillion and the Government added the difference of Rp84.9 trillion to its reserves.

2022 Budget

The 2022 Budget law was enacted on October 27, 2021. Budget policy for 2022 continues to focus on economic recovery and structural reform. The key macroeconomic assumptions for 2022 underlying the 2022 Budget contained in the bill are as follows:

- an economic growth rate of 5.2%;
- an inflation rate of 3.0%;
- an average Government 10-year bond rate of 6.80%;
- an exchange rate of Rp14,350 to U.S.\$1.00;
- an ICP of U.S.\$63 per barrel;
- an oil production by the Republic of 703 thousand barrels of oil per day; and
- gas production by the Republic of 1.036 million barrels of oil equivalent of gas per day.

Tax revenues under the 2022 Budget are targeted at Rp1,510.0 trillion, or a decrease of 2.4% from the 2021 Budget realization of Rp1,546.5 trillion. Non-tax revenues under the 2022 Budget are targeted at Rp335.6 trillion, or a decrease of 25.8% from the 2021 Budget realization of Rp452.0 trillion.

Total expenditure under the 2022 Budget are estimated at Rp2,714.2 trillion, or an 2.6% decrease from the 2021 Budget realization of Rp2,786.8 trillion, comprising of Rp1,944.5 trillion in central Government expenditures and Rp769.6 trillion in transfer to regional and rural funds. Allocations in the 2022 Budget include (i) Rp255.4 trillion for health budget; (ii) Rp431.5 trillion for social protection budget; (iii) Rp542.8 trillion for education; (iv) Rp365.8 trillion for infrastructure development; (v) Rp25.4 trillion for optimizing information and communication technology; and (vi) Rp92.3 trillion for food security.

The primary deficit in the 2022 Budget is projected to be Rp868.0 trillion or 4.85% of projected 2022 GDP, higher than the deficit of 4.65% of projected 2021 GDP in the 2021 Budget. The Government expects to fund the deficit from debt financing.

Realization of 2021 Budget

The key macroeconomic results for 2021, as compared with the key macroeconomic assumptions underlying the 2021 Budget, are as follows:

- economic growth rate of 3.7% (preliminary projection), compared to 5.0% in the 2021 Budget;
- an inflation rate of 1.87%, compared to 3.0% in the 2021 Budget;
- an average Government 10-year bond rate of 6.35%, compared to 7.29% in the 2021 Budget;
- an exchange rate of Rp14,312 to U.S.\$1, compared to Rp14,600 to U.S.\$1 in the 2021 Budget;
- an ICP of U.S.\$68.5 per barrel, compared to ICP of U.S.\$45.0 per barrel in the 2021 Budget;
- oil production by the Republic of 662 thousand barrels of oil per day (preliminary projection), compared with 705 thousand barrels of oil per day in the 2021 Budget; and
- gas production by the Republic of 982 million barrels of oil equivalent of gas per day (preliminary projection), compared to 1,007 million barrels of oil equivalent of gas per day in the 2021 Budget.

The realization of total Government revenues (including grants) for 2021 was Rp2,003.1 trillion, or 114.9% of the targeted amount set out in the 2021 Budget. Total Government revenues consisted of Rp1,546.5 trillion in tax revenues and Rp452.0 trillion in non-tax revenues. Tax revenues realization in 2021 has returned to its pre-pandemic level in 2019 of Rp1,546.1 trillion. The positive tax revenues performance is driven by improvement in tax revenues from the majority of the main sectors contributing to tax revenues. During 2021, total Government expenditures realization amounted to Rp2,786.8 trillion, or 101.3% of the projected expenditures in the 2021 Budget. This is in line with the countercyclical Budget policy strategy taken by the Government to deal with the resurgence of the delta variant in the second half of 2021 and to encourage national economic growth amidst the ongoing impact of the Covid-19 pandemic. Total expenditures consisted of Rp2,001.1 trillion in central Government expenditures and Rp785.7 trillion in transfers to regions and rural funds.

Government Finances

The following table sets forth information regarding the revenues and expenditures of the Government for the periods indicated.

Government Revenues

The following table sets forth Government revenues by category for the periods indicated.

Government revenues increased by 21.6% from Rp1,647.8 trillion in 2020 to Rp2,003.1 trillion in 2021, driven by increases in domestic revenues. By the end of 2021, total tax revenues increased by 20.3% from Rp1,285.1 trillion in 2020 to Rp1,546.5 trillion in 2021, in line with improving economic activity and international trade. Total non-tax revenues increased by 31.5% from Rp343.8 trillion in 2020 to Rp452.0 trillion in 2021, in line with the upward trend in commodity prices, especially oil, minerals, coal, and crude palm oil (CPO).

- (1) Consists of Social Assistance from Ministries/Agencies Spending and Social Assistance for Disaster Relief.
- (2) Consists of specific autonomy fund and additional specific infrastructure autonomy fund for Papua and West Papua Provinces.

Total Government expenditures in 2021 reached Rp2,786.8 trillion or an increase of 7.4% from Rp2,595.5 trillion in 2020. This is mainly driven by the realization of central Government expenditures, which, among other things, support the handling of the impact of the Covid-19 pandemic, especially in health sector and social protection. Total central Government expenditures increased by 9.2% from Rp1,833.0 trillion in 2020 to Rp2,001.1 trillion in 2021, primarily due to high expenditures from line ministries, which was mainly driven by the realization for infrastructure, connectivity projects, vaccination, medical treatment claims, productive relief programs, as well as disbursement of various protection programs. Total transfers to regions and rural fund increased by 3.0% from Rp762.5 trillion in 2020 to Rp785.7 trillion in 2021.

Foreign Exchange and Reserves

Exchange Rates

The following table sets forth information on exchange rates between the Rupiah and the U.S. dollar for the periods indicated.

Exchange Rates

	End of Period	Average
		ah per dollar
2016	13,473	13,305
2017	13,568	13,385
2018	14,380	14,246
2019	13,883	14,139
2020	14,050	14,525
2021^	14,252	14,296

Source: Bank Indonesia

As of December 31, 2021, the Rupiah depreciated by 1.42% to Rp14,252 per U.S. dollar from Rp14,050 per U.S. dollar as of December 30, 2020, but on average the Rupiah appreciated by 1.60% year to date to Rp14,296 per U.S. dollar. Rupiah exchange rate movements remain under control despite continued global financial market uncertainty in response to external sector resilience and Bank Indonesia's stabilization measures. Bank Indonesia continues to strengthen rupiah exchange rate stabilization policy in line with the currency's fundamental value and market mechanisms through effective monetary operations and adequate market liquidity.

International Reserves

The following table sets forth the Republic's total official international reserves, expressed in (i) U.S. dollar equivalents and (ii) the number of months of imports and Government external debt repayments, in each case at the end of the periods indicated. These reserves consist of foreign exchange, gold, SDRs and a reserve position with the IMF. Indonesia complies with the IMF's Special Data Dissemination Standard requirement on international reserves and foreign exchange currency liquidity.
