2023 FINANCING NEEDS & SOURCES

2023 FINANCING POLICIES

Our debt financing policies encourage a flexible and sustainable approach to debt management in order to support economic transformation. In the midst of increasing global risks, fiscal pressures, and moderating domestic SBN demand, we will optimize non-debt financing sources, taking into account the financing needs and choosing the right time for issuance.

General debt policy direction

Management of prudent and sustainable debt financing by controlling debt risk at a safe and credible level

Prioritizing domestic sources of financing to increase financial independence

Procurement of foreign debt as an effort to mitigate the crowding out effect

Flexibility in debt financing, both in terms of timing and composition, to obtain the most favorable costs and risks for the government

Utilizing cash loans within the framework of financing flexibility to ensure the fulfillment of financing, while the choice of cash loan currency takes into account cash requirements and debt portfolio management

2023 BUDGET FINANCING REALIZATION

The budget deficit is back below 3 percent, and for the first time, the tax target is above IDR 2,000 tn.
